TRANSLATIONS REGISTER - INDEX

NATIONAL TRANSLATIONS CENTER

INDEX INFORMATION

GENERAL INFORMATION

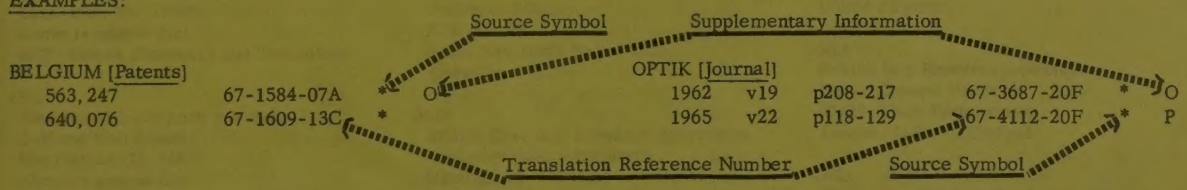
The index portion of Translations Register-Index includes two sections: journal citations and patent citations. Reports, standards and other serial publications are included in the journal section, listed alphabetically by title. Patents are arranged alphabetically by country. Cover-to-cover translations journals are not indicated in TR-I. Information regarding availability of those publications can be found in the compilation by Carl J. Himmelsbach and Grace Brociner: "A Guide to Scientific and Technical Journals in Translation", 2nd edition (New York, Special Libraries Association, 1972) or by contacting the National Translations Center directly.

HOW TO USE THE INDEX

In the Journal Citation Index, when applicable and available, the following data is given in this order: year of publication; series (preceded by "s"); volume (preceded by "v"); issue or number (preceded by "n"); pages (preceded by "p"); the reference number assigned to each translation; a symbol or code indicating the source of availability of the translation and additional symbols giving specific details about the nature of the translation cited. Along with translations of foreign patent documents, the Patent Citation Index includes information regarding corresponding English language patents. Letters and sumbols used in both sections are: O (illustrative material or references omitted); P (partial translations); CLM or CLMS (patent claim or claims); SUP (supplement); ADD (patent addition); CRSPD (corresponding English language patent). Further abbreviations may be used to designate special issues or parts of a journal; these appear in a variety of forms, such as PT, SPEC. NO., etc.

Several things should be noted in using the index. It is cumulative on a semi-annual basis for all entries to date in the volume. Incomplete available information regarding a translation may result in its being listed slightly out of chronological or page number order, so every search should include the scanning of all citations for the year in question. In some cases, there is more than one translation of the same original. When this occurs, the complete journal citation is not repeated, but multiple listings of reference numbers and availability symbols appear after the single citation. The serial publications of organizations and institutions are listed under the publication or series title. Thus, the name of the issuing oragnization follows the name of the publication, (e.g., Bulletin de l'Academie de Medecine, Paris: Doklady Akademii Nauk SSSR: Berichte der Deutschen Chemischen Gesellschaft). This system is commonly used, but it is in contrast to the corporate cataloging entry method employed in the Union List of Serials, New Serials Titles, etc. Some examples of typical index entries are illustrated below.

EXAMPLES:



ABBREVIATIONS USED

ADD-	Addition	O-	Figures, refs. omitted
CLM or CLMS-	Patent Claim(s)	P-	Partial translation
SUP-	Supplement	CRSPD-	Corresponding English language patent

ORDERS AND INQUIRIES

When copies of translations are being ordered, it is very important that they be identified by the reference numbers assigned to each, as well as by the complete journal citation. Please refer to the "Directory of Sources" on the preceding pages for an explanation of the symbols designating organizations from which copies can be ordered.

Inquiries as to the possible availability of any translation should be addressed to:

The National Translations Center
John Crerar Library
35 West 33rd Street
Chicago, IL 60616

TRANSLATIONS

REGISTER – INDEX

NATIONAL TRANSLATIONS CENTRE

INDEX INFORMATION

GENERAL INFORMATION

The index system of Translations Register-Index includes two volumes: [illegible] and [illegible]. Generally, the two volumes are used together, the former to refer to the latter, listed alphabetically by [illegible]. Reports are arranged alphabetically by country. Every [illegible] is not included in [illegible]. Information about [illegible] of these publications can be found in the publication by Cecil E. Thornbrough and Grace Thornbrough, "Periodical Materials in Translation," 2nd edition (New York, Special Libraries Association, 1961), or by consulting the National Translations Center directly.

HOW TO USE THE INDEX

In the [illegible] section below, [illegible] are duplicated. The following rules are given in this order of [illegible] that are [illegible] in volume ("a") volume [illegible] to "b") [illegible] or another [illegible] volume ("b"). [illegible] to [illegible] [illegible] [illegible]
